GLOBAL CAPABILITY CENTRES

From outsourcing to ownership.

Design, Build, Operate, Transfer — your risk-mitigated roadmap to a fully owned Global Capability Centre in South Africa.

Start a conversation | See the method

From outsourcing to ownership.

Trilogy GCC allows you to move beyond outsourcing. Design, Build, Innovate, Transfer — your risk-mitigated roadmap to a fully-owned Center of Excellence in South Africa.

Establish a Global Capability Center in South Africa that functions as a seamless extension of your headquarters — transitioning from third-party dependency to a fully-owned global asset.

- Build your own capability center in South Africa.
- DBIT assists international BPO or enterprise companies to establish global capability centers in South Africa.
- Global capability centers or captives provide between 20%–30% cost savings versus offshore outsourcing.
- Trilogy also offers a unique digital and autonomous platform to reduce headcount.

AWARDS, CERTIFICATIONS & MEMBERSHIPS

Recognised by the industry.

Over nearly a decade, our award record reflects consistent industry leadership across outsourcing, technology and social impact.

2016
CCMG Best Outsourced Partnership Winner · BPESA Best Outsourced Winner & Best Use of Social Media

2017
BPESA / CCMG Best Outsourced Contact Centre · Best Use of Social Media & Technology Innovation

2018 – 2019
Best Outsourced Contact Centre Finalist · Best Outsourced Partnership (Engage UK) Finalist · BPESA Best Impact Sourcing & Service Provider Winner

2021
Contact Centre World, Best Partnership **Ranked #1 EMEA · #2 Globally**

2022 – 2023
BPESA Best Partnership & Shared Services Finalist · Cape BPO Top Technical Innovation Finalist
BPESA & Cape BPO National Top Service Provider, Winner

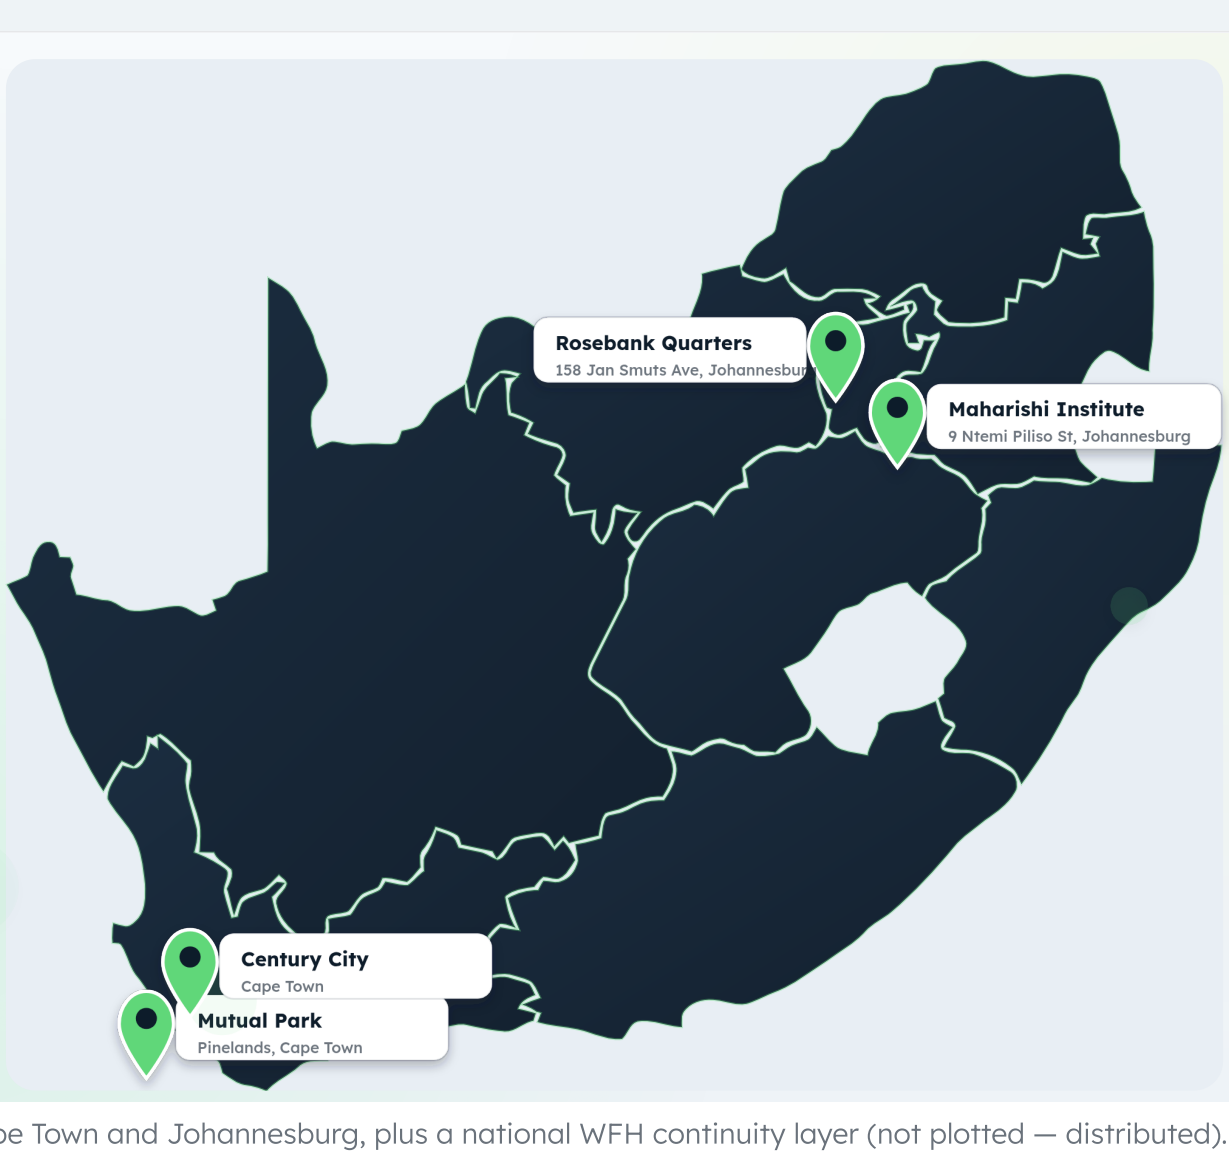
2025
CapeBPO & BPESA Top Support Service Provider Finalist · BPESA Top BPO Operator Finalist & Runner-Up

CAPEBPO FROM CAPE TOWN TO THE WORLD · PROUD MEMBER 2026 | 2027 BPESA · CYBER ESSENTIALS PLUS · PCI DSS COMPLIANT

SOUTH AFRICAN FOOTPRINT

Cape Town and Johannesburg, live today.

More than 1,000 FTEs across Cape Town and Johannesburg. Every site is Trilogy owned or leased and operated directly — never via franchise or affiliate.

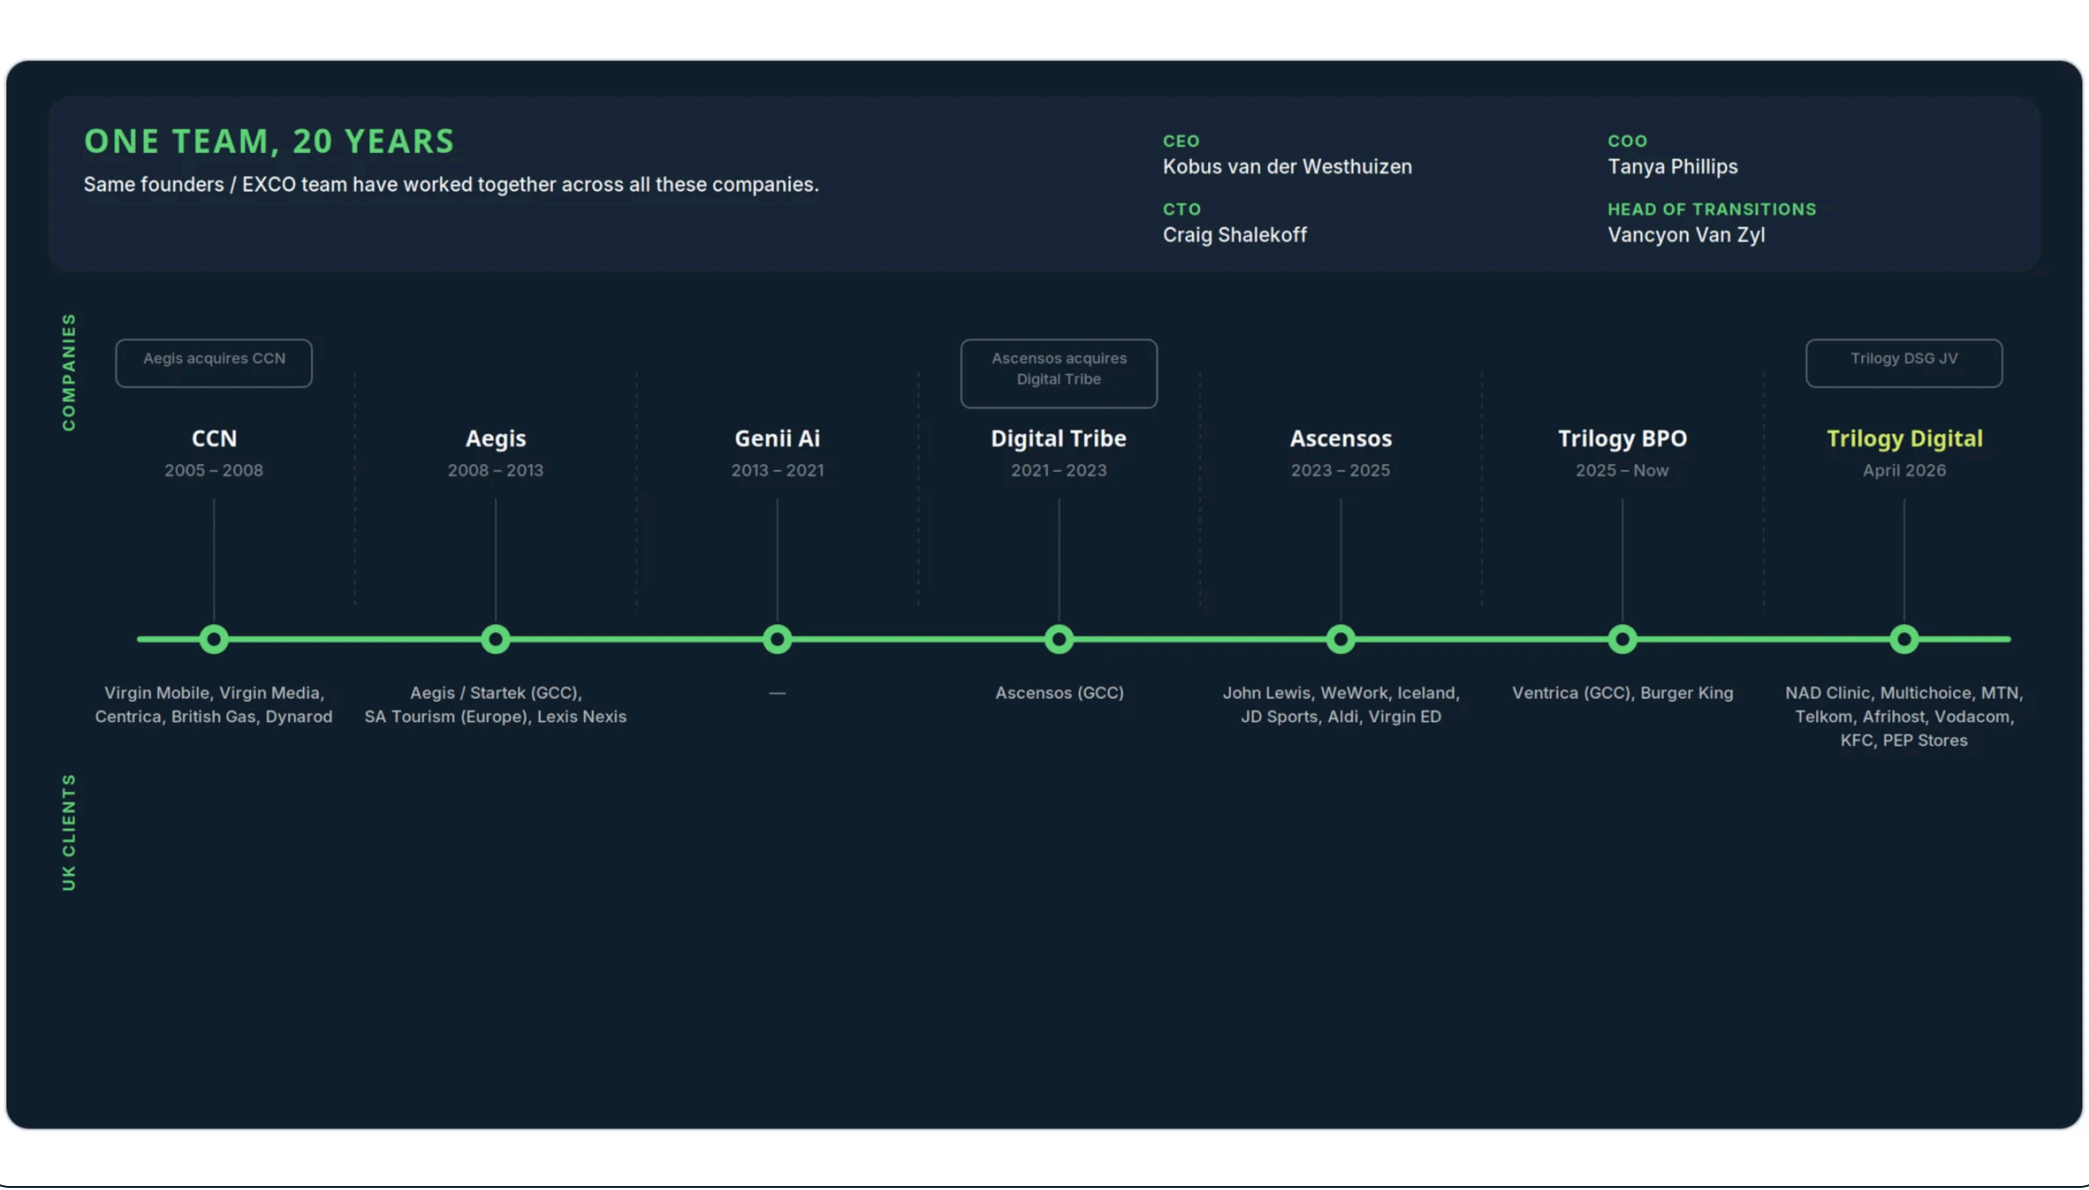


Four physical sites across Cape Town and Johannesburg, plus a national WFH continuity layer (not plotted — distributed).

MANAGEMENT JOURNEY & UK CLIENT EXPERIENCE

One team, 20 years.

The same founders and EXCO team have worked together across every company in this journey — from CCN through to Trilogy GCC.



Company	Years	UK clients
CCN	2005 – 2008	Virgin Mobile, Virgin Media, Centrica, British Gas, Dynarod
Aegis	2008 – 2013	Aegis / Startek (GCC), SA Tourism (Europe), Lexis Nexis
Genii Ai	2013 – 2021	—
Digital Tribe	2021 – 2023	Ascensos (GCC)
Ascensos	2023 – 2025	John Lewis, WeWork, Iceland, JD Sports, Aldi, Virgin ED
Trilogy BPO	2025 – Now	Ventrica (GCC), Burger King
Trilogy Digital	April 2026	NAD Clinic, Multichoice, MTN, Telkom, Afrihost, Vodacom, KFC, PEP Stores

Brands Our Leadership Has Delivered For

25 years behind the world's brands.

Over the past 25 years, Trilogy's leadership has managed over 30 contact centres for some of the world's most recognised brands. That gives us insight into the challenges and opportunities of offshore customer-service delivery, with deep vertical expertise across telecommunications, utilities, retail, fast food, insurance and technology.

WHY SOUTH AFRICA / WHY CAPE TOWN

The location that wins.

South Africa has consistently been ranked the second most attractive BPO location globally. Cape Town is the premium hub — deep English-language and UK cultural alignment, a mature ecosystem, and compelling cost advantages.

60%
Cost efficiency meets quality
Up to 60% lower operational costs than UK and USA markets — substantial wage arbitrage without compromising quality.

#1
Cape Town: the premium hub
The leading BPO destination, with rapid growth, exceptional infrastructure and the largest skilled talent pool in the region.

GMT+2
Time-zone synergy
A 1 to 2 hour difference with the UK and extended USA coverage.

95%+
Language & cultural excellence
Workforce proficiency in English with neutral accents that resonate with Western consumers.

WHY THE LOCATION WINS

BPO ecosystem leadership — Cape Town has led South Africa's BPO export performance for nine consecutive years, drawing on a 67,000-strong regional workforce.

Operational readiness — sites are live today; no site setup phase, landlord negotiation or infrastructure lead time.

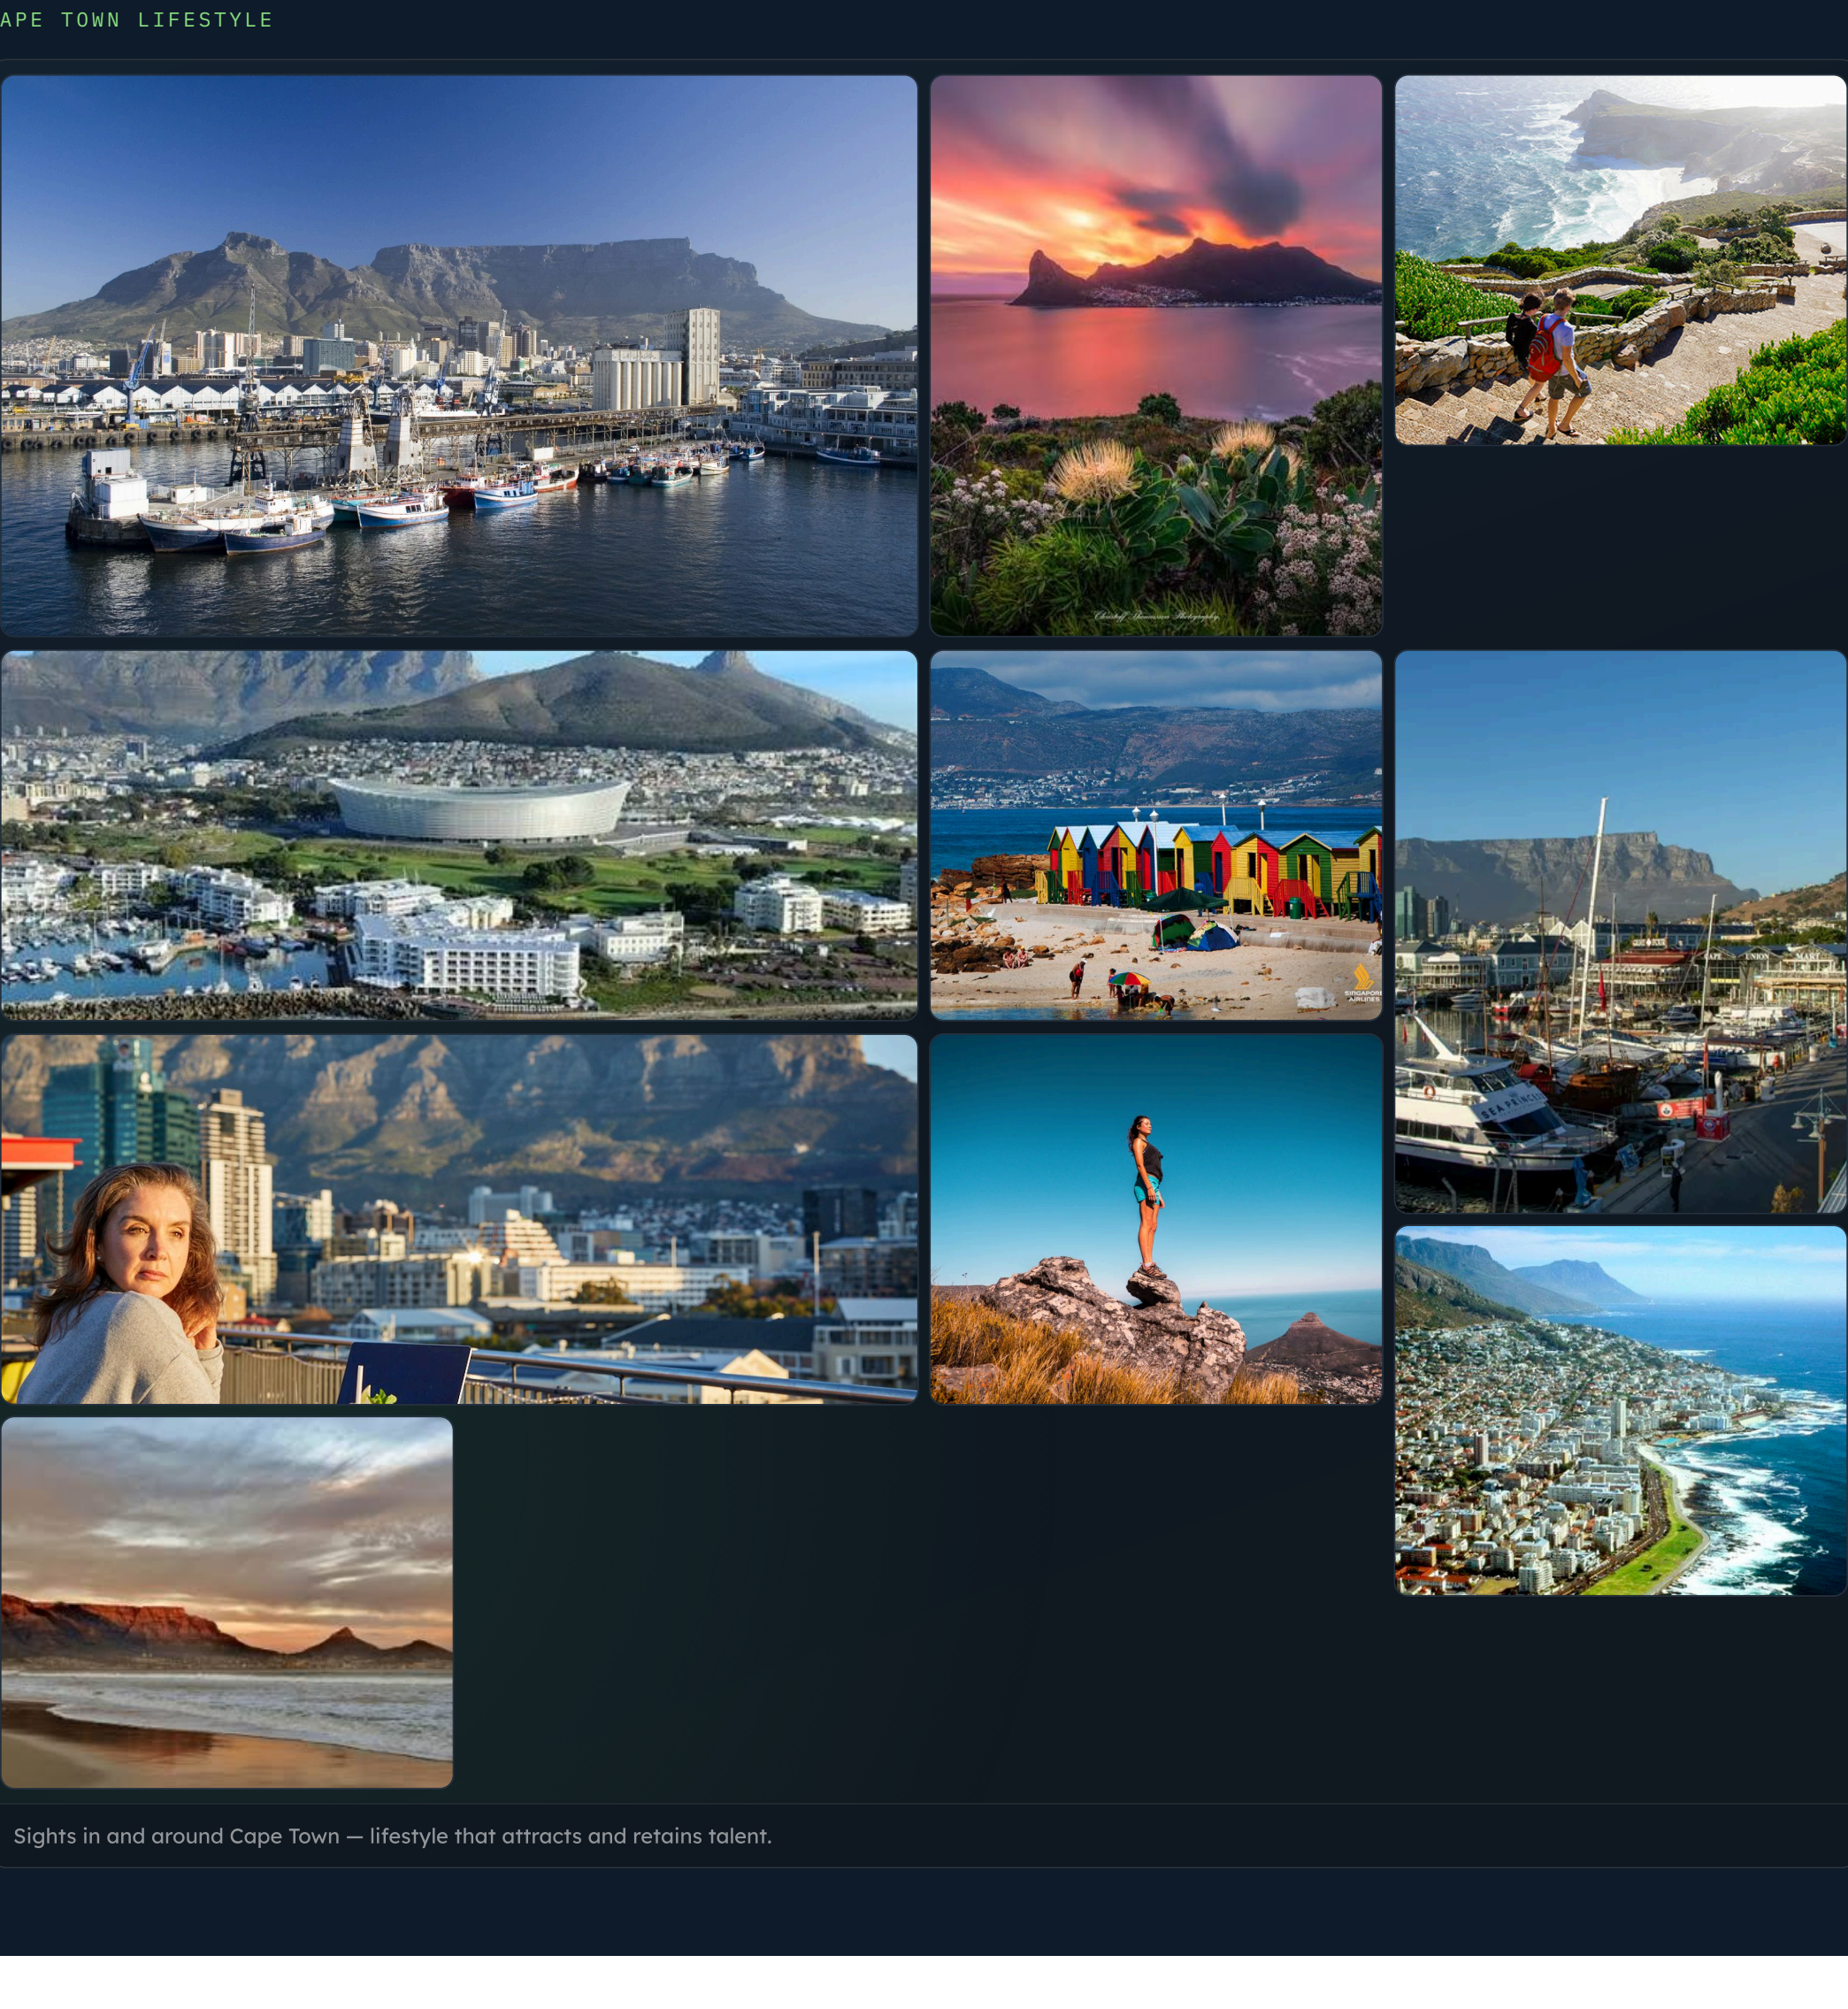
ESG alignment — flagship site holds a 5-Star Green Energy rating from the GBCSA.

Premium infrastructure — multi-redundant fibre, N+1 generator and UPS, biometric access control.

Multi-site resilience — Cape Town and Johannesburg, eliminating single geographic points of failure.

Time-zone synergy — GMT+2 for UK proximity and extended USA coverage.

CAPE TOWN LIFESTYLE



Sights in and around Cape Town — lifestyle that attracts and retains talent.

THE CHALLENGE

Traditional BPO savings stop at labour arbitrage.

Providers earn margin on headcount. When automation reduces staff, it reduces their income — a powerful disincentive to innovate. Bottom line: if a supplier makes less money when you automate, they will never automate fast enough.

OUR SOLUTION

Flipping the incentive structure.

This is offshoring without the BPO tax — you capture 100% of the value creation.

You employ the staff
Your employees work for your entity, following your culture, processes and standards — complete operational control without vendor intermediation.

100% open-book costs
Full transparency into every operating expense. No hidden markups, no black-box pricing.

Fixed management fee
Our compensation is decoupled from headcount — so we are incentivised to help you optimise.

Savings accrue to you
Every efficiency improvement, automation win and headcount reduction flows to your bottom line, not a vendor's margin.

THE DBIT METHODOLOGY

The DBIT Methodology — Design, Build, Innovate & Transfer

A phased, holistic build — not a facilities fit-out on its own. DBIT covers every layer of the operation so localisation risk is designed out, not discovered at go-live.

01 Design
We architect your operating model, technology stack and organisational structure around your specific service-delivery requirements and growth trajectory.

02 Build
We stand up the full operation — recruitment, training, facilities, technology implementation, compliance and governance frameworks.

03 Innovate
We actively reduce required headcount through digital deflection, intelligent routing, automation and AI-assisted resolution — because we are not paid on heads.

04 Transfer
We transition full operational ownership to your team when you are ready, with ongoing support as needed.

HOW DBIT WORKS — EVERY LAYER

Strategic & operational objectives
Business case, migration strategy, project plan, deliverables and a risk matrix with mitigation from day one.

People, culture & brand
HR and people plan (including Section 197 where required), recruitment, training, and your culture transferred into the South African centre.

Management practices
Management processes, practices and systems, plus MI/BI so the captive is measurable from go-live.

Process optimisation & innovation
Process mapping, design and optimisation — then digital and autonomous innovation once the operation is stable.

Platform & facilities
Site build-out, connectivity and a fully kitted floor, delivered to your design specification and branding.

Technology & innovation
Systems integration, data security, disaster recovery, and global plus local best-practice baked into the stack.

A PHASED, HOLISTIC BUILD

Holistic planning. Precise delivery.

01 **Design**	Exhaustive migration plan before anything is stood up: business case, due diligence, requirements, risk matrix, Section 197 people plan, process mapping, technology, facilities, MI and disaster recovery.
02 **Build**	Migrates a BPO operation to a captive — people, process, technology and facilities together — with local know-how, project management and change management through go-live.
03 **Innovate**	Once SLAs, KPIs and quality are stable, innovation covers process, technology, people and customer opportunities — Design, Configure, Deploy, Test and Improve.
04 **Transfer**	Operations, technology, facilities, people, management and knowledge move to you — with project and change management for a clean handover.

The Benefits of DBIT

Building your own capability centre through DBIT delivers advantages across multiple dimensions — beyond cost savings, you gain strategic control, operational flexibility and the freedom to innovate without constraints.

50% **Cheaper Than Onshoring**
Achieve 50–60% cost savings compared to maintaining operations in high-cost markets while accessing the same quality talent and capabilities.

35% **Cheaper Than Outsourcing**
Global Capability Centres provide 20–30% additional savings compared to traditional BPO outsourcing by eliminating vendor margins and overhead.

40% **Further Savings Through Deflection**
Implement aggressive automation, digital deflection and AI strategies without restrictions, driving an additional 15–20% cost reduction over time.

100% **More Control**
Maintain complete ownership and control over operations, technology decisions, data security and strategic direction — critical for long-term competitive advantage.

DBIT EVOLUTION

Cost path from an in-house captive to a GCC.

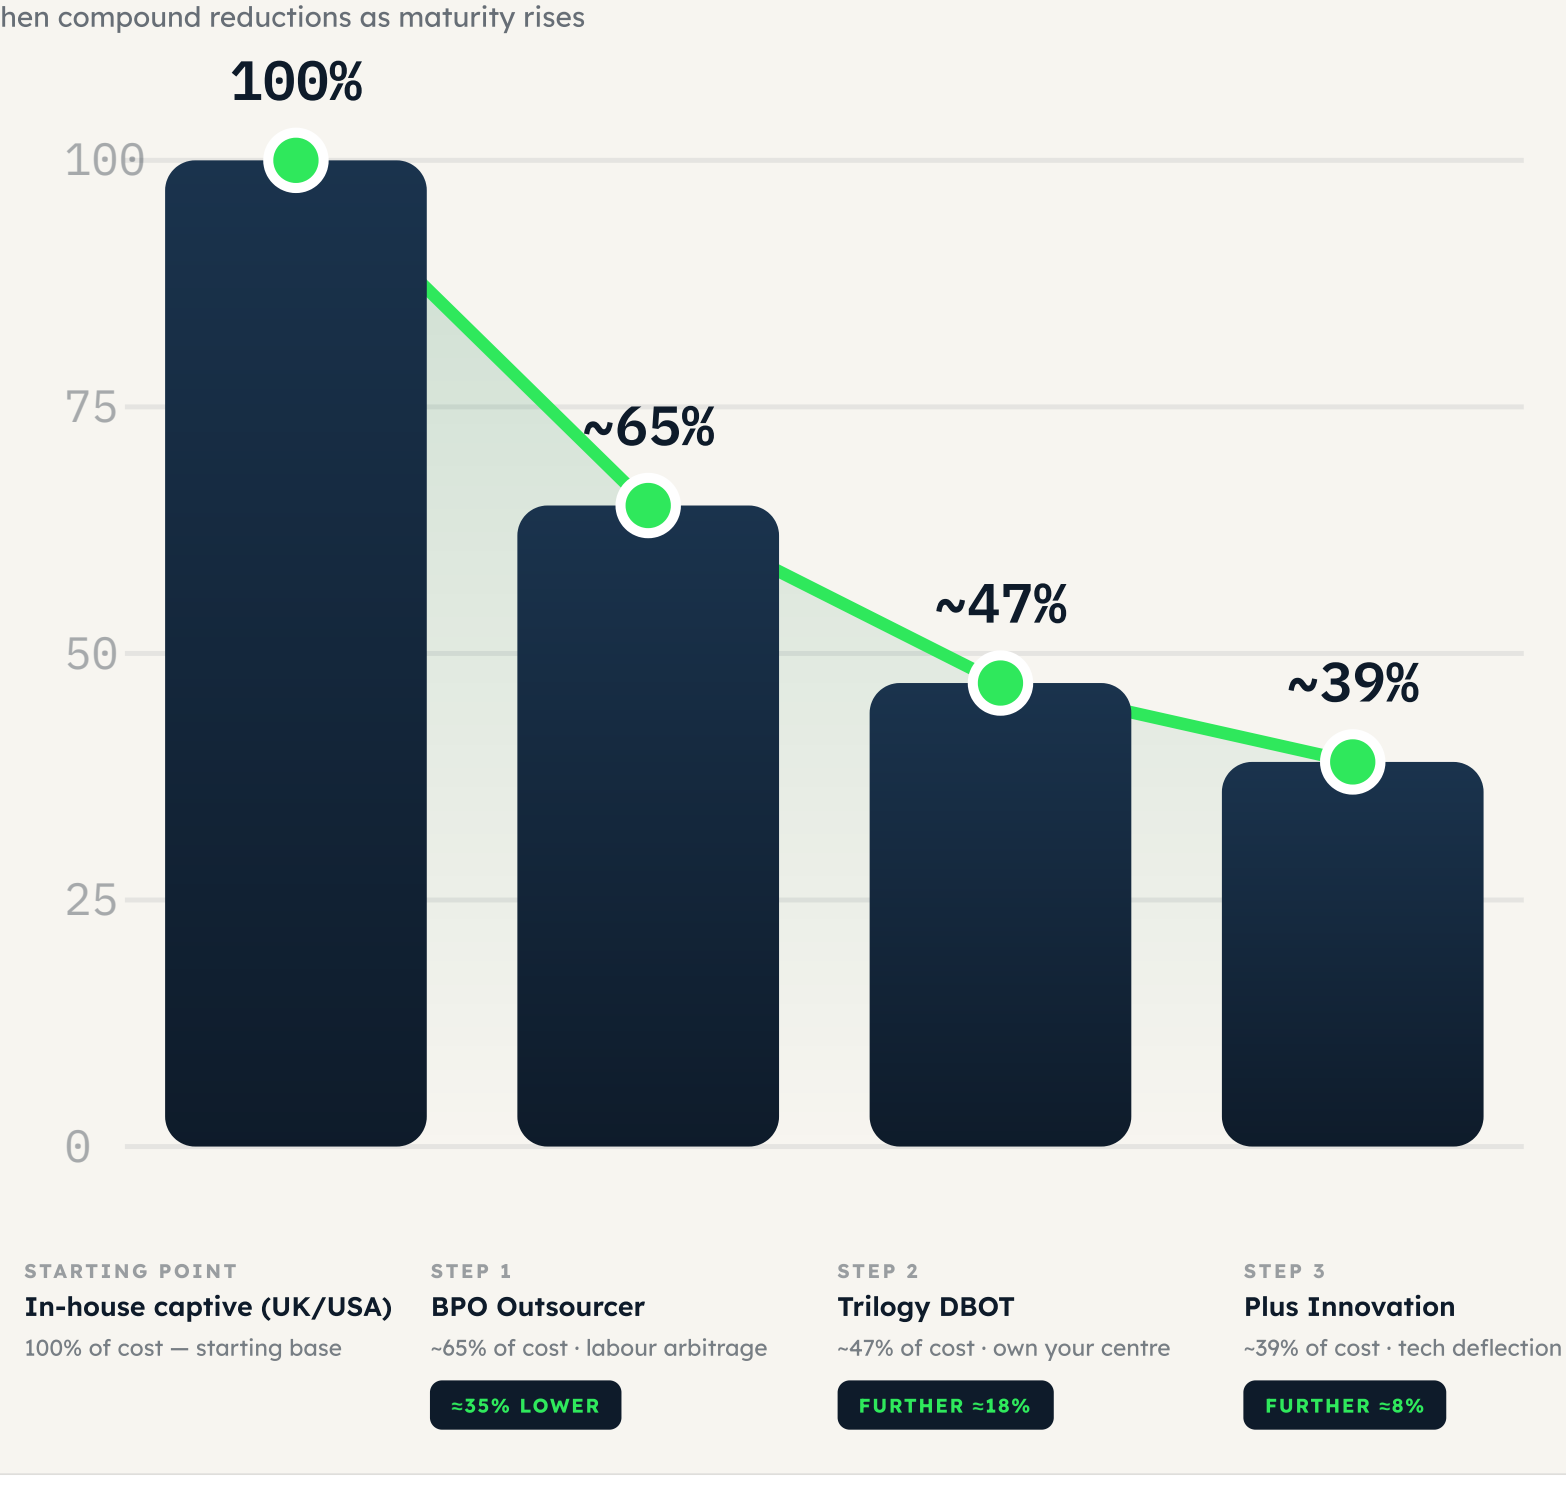
Start at 100% UK/USA cost — then compound reductions as maturity rises

TYPICAL END COST

39%

39% OF IN-HOUSE COST

Midpoint model: labour arbitrage, GCC ownership and AI deflection stacking on the same cost base — from 100% in-house UK/USA down to ~39%.



STARTING POINT	STEP 1	STEP 2	STEP 3
In-house captive (UK/USA)	**BPO Outsourcer**	**Trilogy DBOT**	**Plus Innovation**
100% of cost — starting base	~65% of cost · labour arbitrage	~47% of cost · own your centre	~39% of cost · tech deflection
	≈35% LOWER	FURTHER ≈18%	FURTHER ≈8%

TURNKEY BUILD & STAFFING

Site. Systems. People.

Trilogy stands up the site and the technology stack as a single programme — construction through to telephony — so the captive is ready to operate, not merely occupied.

Site build-out	IT build-out
Construction, electrical, fire & HVAC	Access control, AV and CCTV security
Floors, furniture & fittings, joinery	Networking, LAN, switches and connectivity
Signage, windows and acoustics	Computers, laptops, equipment and telephony
Facilities contingency and professional services	IT professional services and contingency

Exec staffing
Country Executive, Managing Director, Transition Manager, HR Director and IT Director.

Operations staffing
Senior Ops Manager, Ops Manager, Team Leaders, Quality Auditors, HR Admins, IT Support, MIS and agents.

Business & facilities
Business registration & legal, finance, project management, facilities, security, cleaning, connectivity, rental and utilities.

TEAM + EXPERIENCE

We know where the pitfalls and golden nuggets are.

The same management team built three BPO companies sold to international groups. Most recent engagement: 1,000 seats over 24 months, first 100 seats live in six weeks.

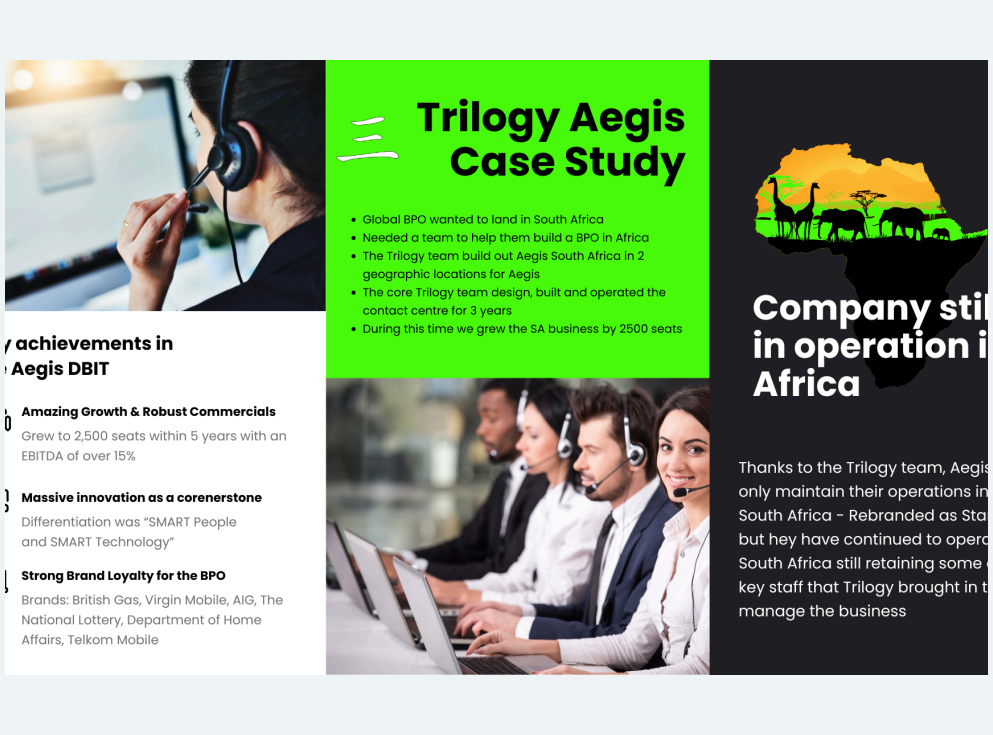
CCN
100 → 850 seats in 3 years. 15% EBITDA. Brands included Virgin Media, British Gas, Mercedes-Benz, BMW, GM and Southern Sun.

Aegis South Africa
4 people → 2,000 seats in 5 years. 15% EBITDA. Brands included AIG, the National Lottery, Department of Home Affairs and Telkom Mobile.

Digital Tribe / Codified
3 people → 1,000 seats in 3 years. Brands included Ascensos, ALDI and JD Sports. BOT pioneer in SA; AWS Global partner.

CASE STUDIES

DBIT at scale — Aegis and Ascensos.



Trilogy Aegis Case Study

- Global BPO wanted to land in South Africa
- Needed a team to help them build a BPO in Africa
- The Trilogy team build out Aegis South Africa in 2 geographic locations for Aegis
- The core Trilogy team design, built and operated the contact centre for 3 years
- During this time we grew the SA business by 2500 seats

achievements in Aegis DBIT

Amazing Growth & Robust Commercials
Grew to 2,500 seats within 5 years with an EBITDA of over 15%

Massive innovation as a cornerstone
Differentiation was "SMART People and SMART Technology"

Strong Brand Loyalty for the BPO
Brands: British Gas, Virgin Mobile, AIG, The National Lottery, Department of Home Affairs, Telkom Mobile

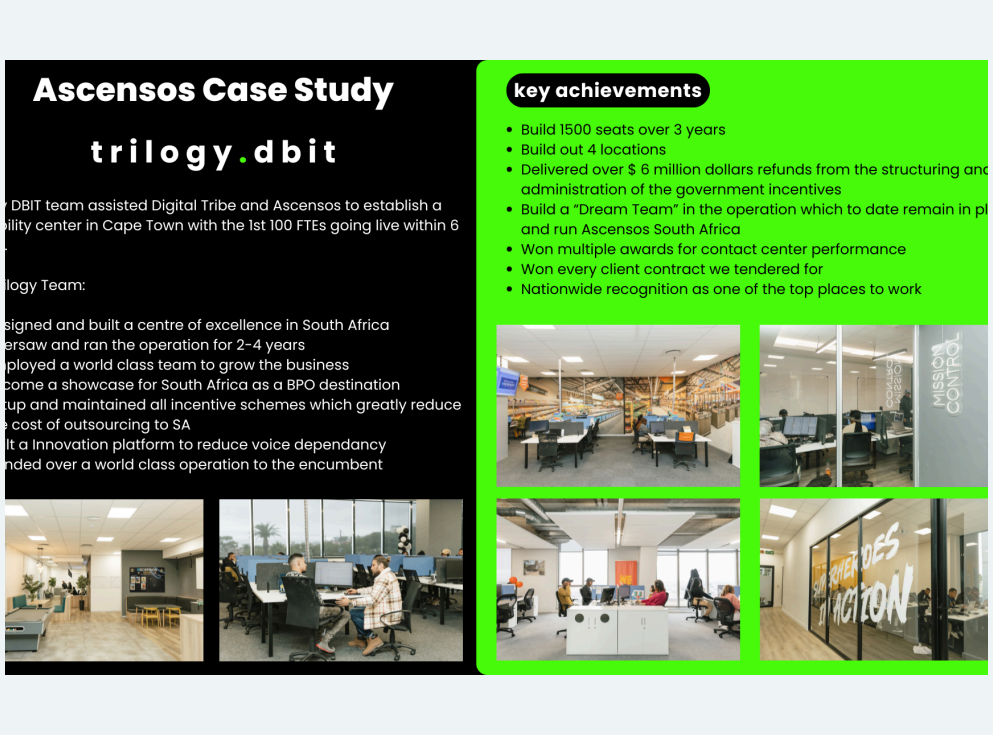
Company sti
in operation i
Africa

Thanks to the Trilogy team, Aegis only maintain their operations in South Africa - Rebranded as Sta but hey have continued to oper South Africa still retaining some key staff that Trilogy brought in t manage the business

Aegis South Africa

Design, build and operate in two South African locations, then a lasting in-country operation.

- Grew to 2,500 seats within 5 years, with EBITDA of over 15%.
- Differentiation: SMART people and SMART technology.
- Brands included British Gas, Virgin Mobile, AIG, the National Lottery, Department of Home Affairs and Telkom Mobile.
- Continues in Africa as Startek, still retaining key staff Trilogy brought in.



Ascensos Case Study

trilogy.dbit

DBIT team assisted Digital Tribe and Ascensos to establish a ility center in Cape Town with the 1st 100 FTEs going live within 6

logy Team:

signed and built a centre of excellence in South Africa
ersaw and ran the operation for 2-4 years
ployed a world class team to grow the business
come a showcase for South Africa as a BPO destination
up and maintained all incentive schemes which greatly reduce cost of outsourcing to SA
lt a Innovation platform to reduce voice dependancy
nded over a world class operation to the encumbent

key achievements

- Build 1500 seats over 3 years
- Build out 4 locations
- Delivered over $ 6 million dollars refunds from the structuring and administration of the government incentives
- Build a "Dream Team" in the operation which to date remain in pl and run Ascensos South Africa
- Won multiple awards for contact center performance
- Won every client contract we tendered for
- Nationwide recognition as one of the top places to work

Ascensos

Cape Town capability centre — first 100 FTEs live in six weeks, then a four-site scale-up.

- Built 1,500 seats over 3 years across 4 locations.
- Delivered over $6 million in refunds from structuring and administering government incentives.
- Built a leadership team that remains in place and runs Ascensos South Africa.
- Won multiple contact-centre performance awards and nationwide recognition as a top place to work.

COMMERCIAL MODELS

A path to ownership — not a locked-in BPO tax.

Trilogy will also assist you to apply and administer DTIC job-creation grants — circa $7,500 per job created — from application through to payment.

Open-book build + management fee
Detailed open-book cost and budget with full transparency, plus a management fee. You see the build and the run-rate.

Cost per productive hour
All costs rolled into a per-productive-hour rate. If you are a BPO taking the centre to market, you add your own margin.

Facility managed services (OPEX)
Full facility managed services as an OPEX model. Trilogy provides the CAPEX for the build so you are not funding the fit-out up front.

WHO DBIT IS FOR

01 In-house operations that want to maximise cost without paying outsourced rates.

02 Already-outsourced operations at maturity that are ready to own the centre.

03 Organisations that want the extra savings of digital and autonomous customer service.

NEXT STEP

Ready to own your South African centre?

Tell us where you are — in-house, outsourced, or starting fresh — and we'll map a DBIT path with open-book costing and a fixed management fee.
